WORK EXPERIENCE

- Worked remotely as a Senior Drupal Developer with Achieve Internet Inc, San Diego, California, USA from March 20th 2017 till June 20th 2020. Projects worked on:
  - https://insider.illumina.com – It's an intranet developed on Drupal 8 to enable illumine staff to collaborate. It involved integration of SAML SSO, Facebook Workplace, Apache SOLR, Micello Maps, and various 3rd party APIs. It has features like Events, News, Favorites, Go Keywords, Forums, Food trucks, Employee profiles, Stock price ticker, Notifications, etc. The site is multilingual with 6 enabled languages. We developed a lot of custom Drush commands to keep features updated. Technologies used: Drupal 8, PHP, Composer, jQuery, Backbone JS, Drush, Drupal Console, Nodejs.
  - https://www.tandemcareplanning.com/ - It's a Drupal 8 and Commerce module-based website for Clients to hire Caregivers for caregiving services. The project involved integration with Salesforce CRM and various 3rd party APIs like Hellosign, Informatica, Checkr, Homework Solutions, and Authorize.net. The payments and orders were handled by Commerce contributed module.
  - https://dev1-apis.origencemlos.com/ - It's a developer portal based on Apigee Edge contributed module and Drupal 8. It provides developers with API documentation, sample response, and request objects along with Try now feature. The site user can upload a swagger file of a proxy with all methods and accordingly proxy node and method nodes are created.
  - https://www.grammy.com/recording-academy - Added a new section called Recording Academy on the site.

Added support for existing News, Events, Press Room content types to support Recording Academy. Enabled user login/registrations for Recording Academy. Migration of Recording academy users to the existing site using Migrate APIs.

- o https://www.dexcom.com/, https://store.dexcom.com - Maintenance and enhancement of site developed in Drupal 7 which is multi-lingual and using multisite architecture. Handled lift and shift phase requirement which involved moving out of Oracle legacy APIs to Salesforce CRM.
- o https://www.achieveinternet.com/ - Maintenance and Enhancement of the site developed in Drupal 8. Added new features like Homepage slider, various new paragraph types, content types. Migration of users entities to Team member content types. Update of contributed modules and Drupal core.
- o Apigee Devportal (Internal Product) - It's a developer portal built on Drupal 8 which allows customers to have an Apigee based developer portal with Blogs, News, Landing pages along with Products, Proxies and Methods.

- Worked remotely as a Technical Architect with Adappt Pvt Ltd from August 8th 2017 till March 17th 2018. Projects Leadership/Worked on:
  - o https://extranet.who.int/goarnops/ - It's a global outbreak alert and response system developed for WHO staff. It is using Drupal 7 and Agular, Bootstrap for the front end built for focal points to collaborate to control outbreaks and public health emergencies across the globe. It was developed fresh with a team of developers and themers.
  - o https://extranet.who.int/goarn/ - The public-facing site for Global Outbreak and Response Network built in Drupal 7 and Bootstrap frameworks.
  - o https://extranet.who.int/nutrition/gina/ - Provided support and maintenance for the site built on Drupal 7.
  - o http://apps.who.int/ihr/eventinformation/ - Provided support and maintenance for the site built on Drupal 7.

- Worked as a Technical Architect with Trigyn Technologies Ltd. from July 1st 2014 to August 4th 2016. Projects Leadership/Worked on:
  - o Shop.un.org - Support & Maintenance of Drupal 7 commerce-based shop for selling publications online.
  - o conf.unog.ch/eservices - Pre-UMOJA request management system developed in Drupal 7 which involved the development of various complex workflows for approval requests raised by UN staffs.
  - o www.ibe.unesco.org - The International Bureau of Education (IBE) is the UNESCO institute specializing in educational contents, methods, and structures. The project involved website redesign, development, and migration of Typo3 to Drupal 7.x.
  - o www.unmas.org - UNMAS is responsible for ensuring an effective, proactive, and coordinated United Nations response to landmines and explosive remnants of war through collaboration with 13 other UN departments, agencies, funds, and programs. The project involved the migration of Portfolio management system built-in ASP and MS SQL to Drupal 7.x. We developed a new Portfolio management system in Drupal and then used various techniques to import data to Drupal entities.

- Worked as a Team Lead with Intelliswift Software Pvt Ltd from October 2nd 2012 to June 25th 2014. Managed a team of Drupal/Php developers. Projects Leadership/Worked on:
  - o www.shukranrewards.com - Shukran Rewards is the Middle East's largest loyalty program which awards points to its customers based on the product's purchase. Migrated site from Java code to Drupal 7.x., migrated users approx. 200k to Drupal. Drupal site development, Mobile APIS, Technology leadership, PCI compliance, Server/SSL set up. Integration with central Siebel Central database for membership card enrolment and activations. Integration with Landmarkshops.com. Technologies used were Drupal 7.x., Apache, PHP FCGID, MySQL, Memcached, APC, Xhprof, Virtualmin, GIT, and Munin.
  - o central.landmarkgroup.com - Central CMS using Drupal 7.x for more than 15 portals, to manage Offers, Products, Stores. Various roles, access levels, and workflow. Developed Beta to live deployment feature, APIs to power the various mobile apps.
  - o www.scheduleasy.com - Resource scheduling software using Drupal 7, Drush, APC, Memcached. ScheduleEasy is a drag-drop based resource Scheduling System, built on Drupal. The scheduling platform is SaaS-based and viewable on any modern HTML5 compatible browser.

- Worked as a Team Lead with Iksula Services Pvt. Ltd. from April 17th 2012 to September 30th 2012. Projects Leadership/Worked on:
  - o www.vidalhealth.com - Integration with Healthex App by which members track their daily diet intake, workouts. Health tips, Consult/chat with the doctor. Create a user account during login if the account is present on Healthex App. Development using Drupal 7.x, Memcached, Varnish, SSL, Apache, MySQL, and GIT.
  - o www.edabba.com - Online eCommerce shop built on Drupal 7.x with Oracle 11g Enterprise Edition. Using Ubercart integrated with the ERP system. Custom Order assignment logic on order placement. Development using Drupal 7.x, Ubercart 3.x, Varnish, Memcached, Oracle 11g, APC.
